

Product Data Sheet

1U 2X32 B GAUGE AUDIO JACKFIELD

Description

| | |
|---------------------------------|-----------|
| 1U 2X32 B Gauge Audio Jackfield | DL-00-044 |
|---------------------------------|-----------|

Audio Accessories developed them for 1/4" patchbay users who need more than 24 or 26 jacks per row in a standard 19" panel.

The 32 input and 32 output jacks allow high density patching with a standard B Gauge plug.

The panel features an offset solder lug for running an earth buss bar, plus a top & bottom identification strip and a rear tie bar.

Features

Features

- Panels come equipped with EIA mounting slots and tie bar.
- The SKINI panel holds 64 1/4" Long-Frame patch points in a standard one rack-unit 19" panel.
- All one rack-unit (1RU) panels (1-3/4") come standard with 2-line designation strips.
- Panel - 078" Western Electric #1 gold alloy contacts.
- Hot-solder-dipped terminals, fanned for ease in wiring.
- Additional ground terminal, offset for busbar.
- Nylon support bumper ensures solid contact.
- Jack frame and bushing are nickel-plated.
