## Simply45® Professional LAN Cable Stripper

### Description

The Simply45® Professional LAN Cable Stripper is a professional LAN cable stripper that is adjustable to professionally strip both unshielded (UTP) and shielded (STP) copper LAN cables. Easy to set up and use, strips Cat7a, Cat7, Cat6a, Cat6, Cat5e, Cat3 shielded and unshielded networking cables.

Product	SKU
SIMPLY45® ADJUSTABLE CAT7A/6A/6/5E UTP/STP STRIPPER - YELLOW	MC-99-9950

#### Simply45® Professional Adjustable LAN Cable Stripper Instructions:

- |  |  |
|--|--|
| 1. Turn the knob counterclockwise on the top of the tool to raise the trimming blade.  | the tool to score the cable jacket. Do not cut too deep as you may nick or cut the insulated wires.  |
| 2. Squeeze the Tool handles to Open and insert your LAN cable in the tool channel.   | 7. Squeeze the tool handles to remove the cable. Gently bend the cable around the score. If done correctly you should hear a slight snap when the jacket breaks free.  |
| 3. Adjust as necessary where you want to strip to begin by sliding the LAN cable forward or backward.                          | 8. Inspect the wire conductors to make sure the wire insulation was not damaged. If the insulation on one of the wires has been cut, then cut off the cable and restart the trimming process from the beginning. |
| 4. Lower the trimming blade by turning clockwise   | 9. After using the Cable Stripper a few times you will get the hang on how tight you need to lower the blade to correctly strip the jacket.  |
| 5. You want the trimming blade to gently touch the cable jacket so that when the tool is turned it will only score the jacket. |  |
| 6. You should only need to use one revolution of turning   |  |
