Lindy 5m USB 2.0 Active Extension Slim

Description

The Lindy USB 2.0 Active Extension Cable Slim uses built-in active electronics to extend the cable length of a USB 2.0 device by an additional 5m whilst continuing to support data transfer rates of up to 480Mbps.

With its USB A male and USB A female connector it allows Type A devices to be connected at longer distances and ensures flexible positioning. Up to 5 extension cables can be chained together to achieve a distance of 25m.

The cable's unique and slim design allows the active electronics to fit into a standard USB connector - an advantage over other active USB leads which use bulky connectors. Compatible with all USB Type A equipped computers.
