

Product Data Sheet

Argosy CAT 6 Low Profile UTP Keystone Jack

Description

The Argosy Cat6 Low Profile UTP Unscreened Keystone Jack Toolless Black, available as part of Cat6 keystone jacks for RJ45 network connections.

This is a reduced size toolless termination RJ45 socket. The reduced size allows for multiple cable entry directions to be accommodated when this jack is mounted in a standard depth back box. This permits many mounting options including flush shutters at the outlet as well as more common angled shutter used with keystone jacks.

The socket itself is housed in a high quality fire retardant plastic cast housing, which opens at the rear in a butterfly manner to reveal the IDC termination points.

Product	SKU
ARGOSY CAT 6 LOW PROFILE UTP KEYSTONE JACK	FA-00-6521

Key Benefits

- ISO, EN & TIA compliant
- Low profile design - 28mm overall depth
- Supports Gigabit Ethernet
- Toolless termination design
- UL94V-0 fire retardant plastic
- Delta 3rd party verified
