

Product Data Sheet

SCHILL GT380RM

Description

The GT Rubber Range comprises a selection of hand-wound cable reels that are suitable for use in the harshest of environments.

With a reliable design and operating temperatures of between -20°C and +100°C, the robust Schill GT380RM makes the storage, use and transportation of cables effortless and is ideal in settings that have a high risk of exposure to oils, petrols or chemicals.

This model is made of unbreakable PVC and has an integrated PVC handle and parking brake. Alongside a removable front panel with auxiliary winding, the drum incorporates three cable supports, two connector clips and an integral winding knob. It is retained on a cantilever axis by a spring catch and is designed to be stacked up to three high for maximum space saving.

Finished in black, it weighs 4.25kg and is compatible with XLR, LS, CEE and multicore cables.
