

Product Data Sheet

Argosy 12G High Density BNC Crimp Plug IMAGE 720/1505

Description

The High-Density BNC delivers true 75Ω ohm performance and allows four times the density with a 51% smaller footprint than traditional BNC connectors and 39% smaller than the Mini-BNC. True 75 Ohm Impedance provides higher performance and unmatched reliability.

Designed specifically for broadcast applications, it is engineered to enhance electrical and mechanical performance. Like the traditional BNC, the HD-BNC connector has the trusted push-and-turn interface, providing tactile feedback and a positive lock for quick and guaranteed mating and easy disconnect.

Adopting the HD BNC is seamless as it uses the same cable prep and termination specifications as legacy broadcast connectors.

Product Data Sheet

Argosy 12G High Density BNC Crimp Plug IMAGE 720/1505

Technical Specification

Argosy 12G HD BNC Crimp Plug 720/1505 Specification

Impedance: 750hm

Frequency Range: 0-12 GHz

Dielectric Withstanding Voltage: 500v

Return Loss: 30dB @ 3Ghz

Voltage Rating: 170 VRMS

Compatibility: Belden 1505A and IMAGE 720
